

EDUCATION

- **Univeristy of Washington** Seattle, WA
B.S. in Computer Science and Software Engineering; GPA: 3.85 *Expected June. 2027*
- **Bellevue College** Bellevue, WA
Associate in Arts and Sciences; GPA: 3.98 *July. 2023 – June. 2025*

PROGRAMMING SKILLS

- **Languages:** Python, JavaScript, C++, SQL, Java **Technologies:** React, Node.js, GitHub, VS Code, AWS

PROJECTS

- **File Management Automation:** Python script that automatically sorts files into categorized folders (e.g., images, documents, videos) to maintain a tidy workspace.
- **Personal Portfolio Website:** Responsive website built with HTML, CSS, and JavaScript (or React) to showcase projects, skills, and contact information. Deployed on GitHub Pages.
- **AI Voice Assistant:** Intelligent voice assistant built with LiveKit Agents and OpenAI APIs featuring real-time speech-to-text, natural language processing, and text-to-speech. Supports voice-controlled temperature management across multiple rooms with async function calls and cloud deployment.

EXPERIENCE

- **Xtatic** Bothell, WA
MathCounts & AMC 8–12 Instructor & Jr. Robotics Club Teacher Assistant *Sep 2025 – Present*
 - **Advanced Math Instruction:** Teach competition-focused math, covering number theory, algebra, geometry, and combinatorics for students preparing for MathCounts and AMC 8/10/12.
 - **Curriculum Development:** Design and adapt problem sets, strategy guides, and structured lesson plans tailored to competition difficulty and student skill levels.
 - **Robotics Support:** Assist students in learning foundational programming, teamwork, and engineering concepts through hands-on robotics activities.
 - **Student Engagement:** Encourage confidence, curiosity, and persistence through interactive problem-solving sessions and guided robotics challenges.
- **Bellevue College** Bellevue, WA
Math Tutor *November 2024 - June 2025*
 - **Problem-Solving Support:** Guided college students through step-by-step solutions in algebra, calculus, and statistics, strengthening logical reasoning and analytical skills.
 - **Technical Communication:** Explained complex concepts in clear, accessible terms, adapting teaching methods to suit different learning styles.
- **Pullscription** Los Angeles, CA
Software Engineering Intern *June 2024 - Sep 2024*
 - **Reusable UI Components:** Leveraged SwiftUI to build 10+ reusable components—including custom buttons and collection views—to ensure consistent and responsive UI across various screen sizes and orientations.
 - **API Integration:** Integrated external API endpoints and services to retrieve and display dynamic content on the iOS app’s Explore page, including secure store authentication.
 - **Backend Development:** Developed and tested endpoints supporting data retrieval, store communication, and robust error-handling workflows.
- **Computer Science Club** Bellevue, WA
Active Member *Sep 2023 - June 2025*
 - **Coding Challenges:** Participated in problem-solving competitions to strengthen programming skills in Python and Java.
 - **Technical Communication:** Explained complex concepts in clear, accessible terms, adapting teaching methods to suit different learning styles.
 - **Team Collaboration:** Worked with peers on small coding projects and debugging exercises.
