EDUCATION

- **Univeristy of Washington** Seattle, WA
B.S. in Computer Science and Software Engineering; *Expected June. 2027*
- **Bellevue College** Bellevue, WA
Associate in Arts and Sciences; GPA: 3.98 *July. 2023 – June. 2025*

PROGRAMMING SKILLS

- **Languages:** Python, JavaScript, C++, SQL, Java **Technologies:** React, Node.js, GitHub, VS Code, AWS

PROJECTS

- **File Management Automation:** Python script that automatically sorts files into categorized folders (e.g., images, documents, videos) to maintain a tidy workspace.
- **Personal Portfolio Website:** Responsive website built with HTML, CSS, and JavaScript (or React) to showcase projects, skills, and contact information. Deployed on GitHub Pages.
- **AI Voice Assistant:** Intelligent voice assistant built with LiveKit Agents and OpenAI APIs featuring real-time speech-to-text, natural language processing, and text-to-speech. Supports voice-controlled temperature management across multiple rooms with async function calls and cloud deployment.

EXPERIENCE

- **Xtatic** Bothell, WA
MathPod Instructor (Grades 1–3, Advanced) & Jr. Robotics Club Teacher Assistant *Sep 2025 – Present*
 - **Interactive Math Instruction:** Lead engaging, hands-on math sessions that inspire curiosity, confidence, and problem-solving in students from Grades 1–3 and advanced levels.
 - **Curriculum Design:** Develop and adapt math lessons to meet diverse learning styles and grade levels.
 - **Robotics Support:** Assist in guiding students through basic programming, teamwork, and engineering principles using robotics kits.
 - **Student Engagement:** Foster collaboration, persistence, and creativity through structured math challenges and robotics activities.
- **Bellevue College** Bellevue, WA
Math Tutor *November 2024 - June 2025*
 - **Problem-Solving Support:** Guided college students through step-by-step solutions in algebra, calculus, and statistics, strengthening logical reasoning and analytical skills.
 - **Technical Communication:** Explained complex concepts in clear, accessible terms, adapting teaching methods to suit different learning styles.
- **BC Hacks** Bellevue, WA
Participant *June 2024*
 - **App Concept:** Designed a mobile application prototype for the event’s theme challenge using Figma for UI design.
 - **Project Planning:** Developed a feature roadmap and user flow diagrams to present to judges.
- **Learner Startups AI Hackathon** Seattle, WA
Participant *May 2024*
 - **AI Solution Design:** Collaborated in a team to develop an AI-powered concept addressing a real-world challenge such as mood planner.
 - **Prototype Development:** Created initial design mockups and logic flow for a proof-of-concept implementation.
- **Computer Science Club** Bellevue, WA
Active Member *Sep 2023 - June 2025*
 - **Coding Challenges:** Participated in problem-solving competitions to strengthen programming skills in Python and Java.
 - **Technical Communication:** Explained complex concepts in clear, accessible terms, adapting teaching methods to suit different learning styles.
 - **Team Collaboration:** Worked with peers on small coding projects and debugging exercises.
